Summary		
Project:	Develop an RSPM on the use of systems approaches to manage pest risks associated with the movement of wood	
General comments:	The objective of this conference call was to incorporate recommended changes in the Explanatory Document (ExD)	
Item 1:	Finalize text of the ExD	
Consensus:	<p>The Chairperson indicated that work during this conference call will be focused on the changes to make in the ExD based on the comments provided by researchers and those added by the EG.</p> <p>He indicated that:</p> <ul style="list-style-type: none"> • The ExD working group got together and incorporated the comments made by the international researchers on the ExD. • The ExD with the changes incorporated was placed in the group's google drive folder. • The ED suggested to "gray out" the areas of the standard that have been already reviewed to have the CC focus on the new additions to the document. • The ExD is not a "normal" Appendix, and what is being done by incorporating it to the standard is unique. 	
Item 2:	Changes to the ExD	
Consensus:	The EG went through all comments and made the agreed upon corresponding changes to the document. Because the ExD will now be an Appendix, the title was changed and the document added to the standard to make one document.	

	<p>A “Chapeau” was added to indicate the document was formatted to be a stand-alone document.</p> <p>Changes were incorporated to the ExD.</p>	
Item 3:	Next steps.	
Consensus:	<ul style="list-style-type: none"> • Send copies of the final version of RSPM 41 with the appendix added to the NAPPO Secretariat • The NAPPO Secretariat will send the document to the editor for review • The NAPPO Secretariat will translate the document • Document will be sent out for country consultation • The Secretariat will share the final edited version of the document with the AMC one more time • AMC will discuss implementation ideas for the standard in their May meeting
