Summary		
Project:	Develop a NAPPO Science and Technology document on the risks associated with Lymantriids of potential concern to the NAPPO region, identifying potential species and pathways of concern.	
General comments:	Country updates were provided by each country. Afterwards, the group started working on the science and technology document.	
Item 1:	Country updates	
Consensus:	<p>US</p> <ul style="list-style-type: none"> • Geo-referencing analysis for some species were completed and they were made available to the group. • Lymantriids regulations for the US were included in the working document. <p>Canada</p> <ul style="list-style-type: none"> • The structure of the document was revised and a format to re-organize the document was proposed. <p>Mexico</p> <ul style="list-style-type: none"> • Compiling information to add SENASICA-SEMARNAT's regulations including detections and surveillance information. 	
Item 2:	Work on the Science and Technology document	

Consensus:	The EG then decided to use the format proposed by Canada. The information in the version prepared by the Mexican EG members was transferred to the new format, more information was added, and editing was done from the beginning of the document.
