Date:	August 25, 2016	
Chairperson	Nancy Villegas, SENASICA	
Participants:		
N. Villegas, SENASICA	R. Favrin, CFIA	Y. Balci, PPQ
C. Devorshak, PPQ (30min)	J. Cranney, Industry	K. Church, CFIA
P. Abad, PPQ	A. Suazo, NAPPO	S. Bloem, NAPPO
<b>Summary</b>		
Project:	Likelihood of establishment	
General comments:	Review document under development Review presentation provided by Christina Devorshak	
Item 1:	PowerPoint presentation - Christina pointed that she developed this to help the group visualize how real examples help in the interpretation of the elements to be considered in estimating the probability of establishment. She indicated the examples used for each element are either very specific or general cases from the US.	
Consensus:	No major comments	
Item 2:	The objective of this project was summarized and explained to the new NAPPO technical director, for his information.	
Consensus:	No major comments	
Item 3:	The document under development was reviewed and it was agreed that members of the group will provide examples to illustrate the interpretation of the elements in section 4 of the document. The examples should include different taxonomic groups (nematode, pathogens, weeds). It was agreed that the elements to be considered would be those listed in the Power Point presentation, which were taken directly from ISPM-11	
Consensus:	Yilmaz commented that some examples he had gathered are applicable to several elements; Yilmaz indicated he had problem with the interpretation of the elements for the potential pest	

	adaptation; it was agreed that a text section could be added to clearly explain each element. The group will contribute with suggestions on how to improve the explanations for each element.	
Other subjects	Use of Google Docs to review the document on the next call. Annual meeting presentation.	
Consensus:	Rob will attend the annual meeting; Yilmaz will not attend; Nancy is trying to attend. Confirm if Christina will be present.
