### Summary

Project:	A North American Approach to Preventing Introduction, Establishment and Spread of Khapra Beetle ( <i>Trogoderma granarium</i> ) in Various Pathways.
General comments:	Hector informed the group that he had submitted three documents (now available in the Google docs folder) for the group to consider. The US noted that it had also provided documents, including a PRA from 1998.
Item 1:	The group discussed how the documents could be reviewed in either language. It was suggested that each EG member that had submitted a document could provide a summary of the document
Consensus:	The group agreed to provide the summaries to the NAPPO Secretariat by JUNE 16. The NAPPO Secretariat will translate the documents and circulate to the EG for its next meeting.
Item 2:	The summaries can be used to determine what information should be included to fill in the outline provided by Hector.
